

Addcomp ADD-VANCE® SA 155 Slip Masterbatch, PP homopolymer base

Category : Other Engineering Material , Additive/Filler for Polymer , Polymer , Thermoplastic , Polypropylene (PP)

Material Notes:

Fields of application: Improves slip properties of Polyolefins. Also it can be used as a release agent for injection molded products Examples: (L)LDPE, HDPE, and PP films, sheets, profiles, injection molded products, etc. Mode of action and advantages: ADD-VANCE SA 155 provides excellent slip properties. ADD-VANCE SA 155 reduces friction between two surfaces for instance between polymer and metal. As a consequence the slip properties of the product are improved Advantages: Highly effective, very long lasting slip properties, already at low dosing rates; Excellent organoleptic properties; Good printability; Non-toxic, non-corrosive and thermally stable (>250 °C); Injection molding: also improved demolding and product release; Non-sticking pellets, dust free; and Safe and easy handling Regulations: ADD-VANCE SA 155 complies with the directive 2002/72/EEC for food approval. The active ingredient in ADD-VANCE SA 155 complies with FDA 21 CFR § 177.1520 Olefin polymers. Information provided by ADDCOMP

| Processing Properties | Metric | English | Comments |
|------------------------|-----------|-----------|----------|
| Processing Temperature | <= 250 °C | <= 482 °F | |

| Descriptive Properties | Value | Comments |
|------------------------|--------------------------|----------|
| Appearance | Slightly yellow granules | |
| Dosing Level | 0.2-2.0% | |
