

Arkema Group Lacovyl® PB 1303 PVC

Category : Polymer , Thermoplastic , Vinyl (PVC) , PVC, Molded

Material Notes:

LACOVYL PB 1303 is a vinyl chloride homopolymer manufactured by microsuspension polymerization process for the preparation of plastisols. It is specially designed for compact articles with low plasticizer content particularly in automotive industry, thanks to its low fogging. * MAIN CHARACTERISTICS Viscosity index (ISO 1628-2):125 ml/g,(K value:70). * APPLICATIONS LACOVYL PB 1303 is recommended for the following applications where low fogging is needed : compact coating for coated fabrics coating by mechanical or chemical foam techniques rotomolding (automotive industry, etc...) dip molding. ISO data provided by the manufacturer, Arkema.
