

BorsodChem ONGROVIL S-465 Suspension PVC-Resin

Category : Polymer , Thermoplastic , Vinyl (PVC) , PVC, Uncompounded

Material Notes:

S-465 is a suspension type PVC homopolymer of medium molecular mass. It is characterized by a porous particle structure, a narrow range of particle size and a relatively high apparent density. It retains its excellent pourability even after compounding. Field of application: Ongrovil S-465 is suitable for both rigid and plasticized applications. It is recommended for the extrusion of rigid profiles and tubes, for injection molding of plasticized articles. Information provided by BorsodChem Rt.
