

## BorsodChem ONGROVIL S-468 Suspension PVC-Resin

Category : Polymer , Thermoplastic , Vinyl (PVC) , PVC, Uncompounded

### Material Notes:

S-468 is a suspension type PVC homopolymer of medium molecular mass. It is characterized by a porous particle structure, a narrow range of particle size and a relatively high apparent density. It retains its excellent pourability even after compounding. Field of application: Ongrovil S-468 is suitable primarily for rigid applications. Its high apparent density makes it especially suitable for the extrusion of rigid tubes and profiles. Information provided by BorsodChem Rt.
