

Chengdu Polyster KP-C600 Compatible Agent with Toughen Ability

Category : Other Engineering Material , Additive/Filler for Polymer

Material Notes:

KP-600 is a compatible agent with toughen ability special for polymer alloys, such as PC/ABS, PC/PBT and so on. It is a high-Tech product developed by our company. Manufactured and applied for more than 10 years, it has been demonstrated that it can effectively improve the compatibility of each component, when PC is compounded with ABS, PBT, PET and so on. KP-600 can reduce the phenomenon of delamination in the process of manufacture, accordingly, it can not only overcome such serious weaknesses as bad fluidity, bad solvent-resistance and stress crack, but also make it manufactured and moulded easy by lowering the manufacture temperature and mould pressure greatly in processing PC. Information provided by Chengdu Polyster Co., Ltd.
