

## Chesterton 218 HDP Liquid alkaline degreaser

Category : Fluid

**Material Notes:**

**Description:** Chesterton® HDP is one of the most powerful non-foaming liquid degreasers available on the market today. Engineered to overcome problems typically found in non-foaming powder cleaners like: Dusting, Respiratory irritation, Dispensing difficulty, High caustic and phosphate content and incomplete dissolution. Its convenient liquid form allows for easy handling and eliminates the respiratory and skin irritation so often caused by powder dust. The superior surfactants in 218 HDP give better rinsability than powdered cleaners, thus eliminating spotting on substrates from cleaner residue. This product is infinitely soluble in water and therefore does not cause the clogging in pipe lines due to incomplete dissolution often seen in powdered products. Chesterton 218 HDP is specifically designed for tough degreasing applications where foam is undesirable such as cabinet and tunnel wash. The product can also be used in floor scrubbing machines where foaming cleaners can cause problems and need added defoaming agents. In addition, 218 HDP exhibits excellent demulsibility of free oils. Demulsibility is important because most spray booth washers draw cleaning solution from the bottom third of the sump. The faster the oil spilt out the float to the surfaces to be skimmed away, the less oil, waxes, loose paint and other difficult soils form hard surfaces. The cleaning efficiency of this product can be boosted with the addition of heat and mechanical impingement. Chesterton 218 HDP can be used to remove heavy grease, oil, waxes, loose paint and other difficult soils from hard surfaces. The cleaning efficiency of this product can be boosted with the addition of heat and mechanical impingement. Chesterton 218 HDP can be used effectively up to 82°C. This is the degreaser to use when the environmental restrictions are as tough as the grease and oil being removed.

**Features:** Nonflammable Highly Concentrated Convenient Liquid Form Phosphate Free Virtually Non-Foaming Excellent Demulsibility NSF A1 – Registration number 133943 Corrosion Inhibited Applications: Spray Booth Washers Tunnel Washers Floor Scrubbers High Pressure Washers Steam Cleaning Any Degreasing Where Foam is Not Wanted.
