

Dow Corning A-4040 PRIME COAT

Category : Polymer , Thermoset , Silicone

Material Notes:

Dow Corning® 9601 Textile Printing Ink is a two-component silicone product designed for manual screen printing processes. The 100:4.5 base to catalyst design simplifies the pigmentation process; only the base requires pigment addition because addition of unpigmented catalyst has little effect on the printing ink color. After curing, the printing exhibits a semi-gloss appearance. An environmentally friendly product, Dow Corning® 9601 Textile Printing Ink does not contain organotin, phthalate or solvent. Information provided by Dow Corning
