

Dow Corning AP-8087 FLUID

Category : Polymer , Thermoplastic , Siloxane

Material Notes:

This amino functional siloxane polymer can be used in a range of hair care applications including shampoos, rinse-off conditioners, leave-in conditioning treatments, colorants, and styling products. It has lower amine content and higher molecular weight compared to other amino silicones. Dow Corning® AP-8087 Fluid provides improvements in both wet and dry combing in both shampoos and rinse-off conditioners. When used in a rinse-off conditioner it reduces the loss of color in colored hair. In addition, when used in leave-on applications, it enhances hair shine and smoothness and reduces hair static.
