

Dow Corning S40 LIQUID SILICONE RUBBER KIT

Category : Polymer , Thermoset , Rubber or Thermoset Elastomer (TSE) , Silicone , Silicone Rubber

Material Notes:

A heat-cured elastomer for use by customers fabricating medical devices, including those intended for implantation in humans for less than 30 days and non-implant applications. Dow Corning® S40 Liquid Silicone Rubber is a two-part platinumcatalyzed silicone elastomers specifically designed for liquid injection molding or supported extrusion. The elastomer is supplied as a two-part kit (Part A and Part B), equal portions (by weight) of which must be thoroughly blended together prior to use. The elastomer is thermally cured via an addition-cure (platinum catalyzed) reaction. When blended and cured as indicated the resulting elastomer consists of crosslinked dimethyl and methyl-vinyl siloxane copolymers and reinforcing silica. Information provided by Dow Corning
