

## Dyna-Purge<sup>®</sup> E Purging Compound

Category : Polymer , Thermoplastic , Purging Compound

**Material Notes:**

Designed for Purging High-Temperature Engineering Resins  
 General Description: DYNA-PURGE E is a high heat-resistant, non-abrasive, non-chemical engineered thermoplastic purging compound, formulated to purge high-temperature engineering resins. A non-melting but softening thermoplastic scrubs the screw and barrel of both injection molding machines and extruders, while the carrier matrix flushes away impurities.  
 FEATURES & BENEFITS OF DYNA-PURGE E  
 Excellent for color to clear changes, resin changes, preventative machine maintenance, and before manual cleaning  
 Effective through a wide temperature range 590°F-700°F (310°C-371°C)  
 Easy to use "no process adjustment necessary" use at the resident resin processing temperature and RPM speed  
 Non-abrasive, non-melting but softening thermoplastic, which thoroughly loosens carbonized and degraded resin, allowing it to be flushed out of the system  
 Safe, non-hazardous, with no chemicals - ingredients are FDA compliant  
 Heat stable "recommended during shutdown and start-up"  
 Low cost-per-purge  
 "only small quantity needed to be effective"  
 No mixing required "simply use as is"  
 Unlimited shelf life
