

Hardwire 3x2-4-12 Low Density Tape

Category : Metal , Ferrous Metal , Carbon Steel , High Carbon Steel , Metal Foam, Mesh, or Honeycomb

Material Notes:

The 3x2 Hardwire is a high carbon steel cord with a micro-fine brass or AO-brass (Adhesion Optimized) coating. The 3x2 wire cord is made by twisting 5 individual wire together - three straight filaments wrapped by 2 filaments (All filaments are 0.01378 in diameter) at a high twist angle. The result is an easy to handle cord that combines great engineering values with excellent economics. If your application is tension dominated choose the 3x2. Characteristics: Best properties in tensile applications. Excellent mix of engineering properties - Up to 8 KIPS/inch. Great stiffness, instant wet-ability, and excellent conformability. Works in all resins. Asymmetric shape acts like a screw and gives mechanical bonding characteristics. Excellent fatigue properties in tension and in high-flex situations. Great choice for extrusion and pultrusion applications. All information provided by Hardwire, LLC.
