

Lucite International Colacryl Â® PD2 Acrylic Dental Resin

Category : Polymer , Thermoplastic , Acrylic (PMMA)

Material Notes:

A range of Methyl Methacrylate polymers designed for use as standard heat-curing denture base resins. Features: Fine free-flowing bead polymers containing residual peroxide initiator; Curing cycles from 2 hours using ColacrylÂ® TS 1502 liquid; Designed to meet the requirements of ISO 1567/ADA 12; Choice of process properties including prolonged work time. Benefits: Cures water-white when processed with ColacrylÂ® TS 1502 liquid; Reduced risk of micro-porosity in thicker sections; Improved color stability when processed with ColacrylÂ® TS1502. Information provided by Lucite International
