

Momentive Performance Materials FSE7520 Heat Cured Fluorosilicone Rubber

Category : Polymer , Thermoset , Rubber or Thermoset Elastomer (TSE) , Silicone , Silicone Rubber

Material Notes:

Heat cured rubber is a high consistency product that can be molded, extruded or calendered using conventional rubber processing equipment to meet a wide range of cost, durability and performance standards. Fluorosilicones are suitable for applications in presence of fuel, oils, blow by gas, and various solvents. FSE7540 is a peroxide curable, general purpose grade silicone elastomer. All Fluorosilicones are available as customized ready-to-use products.
