

Multibase Dow Corning® 4-7051 Siloxane Powder Resin Modifier

Category: Polymer, Thermoplastic, Siloxane

Material Notes:

DOW CORNING 4-7051 Siloxane Powder Resin Modifiers are 100% active, free-flowing, siloxane powders. They are available in several grades with varying types of organic reactivity processing thermoplastics. They can modify the burning characteristics of thermoplastics, reducing the rate of heat release and the rate of smoke and carbon monoxide evolution. Similar burning characteristic modifications have been observed in halogen-free, halogenated and phosphorus flame retardant systems. Information provided by Multibase, a Dow Corning Company
