

Polystrand ThermoPro™ IE6021 ECR Unitape Unidirectional Polyethylene-Glass Composite

Category : Polymer , Tape , Thermoplastic , Polyethylene (PE)

Material Notes:

Fiber Orientation is 0°. Polystrand ThermoPro™ combines continuous E-Glass (ThermoPro-E™) structural reinforcing fibers in either a polyethylene or polypropylene proprietary thermoplastic polymer to form ribbons or tapes. These material forms can be subsequently molded by high temperature processing to create end-use applications including pipe, tanks, liners, automotive, architectural, and a host of other structural industrial and commercial products. Polystrand ThermoPro™ is the result of a quest of more than 15-years to develop structural thermoplastic composites for the international industrial and commercial markets. Information provided by Polystrand.
