

Reltek BONDiT™ B-4821 Adhesive and Sealant

Category : Polymer , Adhesive

Material Notes:

Key Properties Excellent adhesive for low surface energy plastics. High chemical resistance in a semi-flexible system. A filled version of B-482 to further increase chemical resistance and electrical properties and to lower shrinkage. Ease of use. **Applications** Very tough, flexible coating, primer and potting compound with high chemical resistance. Alternative to castable polyurethanes, particularly for electrical cable connector transducer termination. Excellent for electrical and electronic applications as protective encapsulant against very wide range of harsh environmental applications. Excellent for marine applications. Can be applied to oily surfaces. Will cure underwater. Ambient 24 hour or accelerated thermal cure. Information provided by Reltek LLC
