

Rogers Corporation Bisco™ Composite Cellular Silicone Foam

Category : Polymer , Thermoset , Rubber or Thermoset Elastomer (TSE) , Silicone , Silicone Foam

Material Notes:

In addition to specific grades listed in the database, one or two substrate composites using silicone foam core may also be utilized.

Abrasion resistance and semi-rigid conformability. Applications: Lip seals on automotive underbody heat shields, Flame-retardant carpet underlay for specialized aircraft, Baffle material for conveyor oven openings to reduce operating costs

General BISCO™ silicone information: BISCO™ Cellular Silicones are used as sealing cushioning, vibration isolation, insulation, and thermal management gaskets. Their

resistance to environmental extremes, mechanical resilience, and safety features lead to their use in transportation equipment,

communications and electrical enclosures, electronic products and components, industrial machinery, and appliances. Data provided by

Rogers Corporation.
