

SABIC EPS 652 Expandable Polystyrene

Category : Polymer , Thermoplastic , Polystyrene (PS) , Expanded Polystyrene (EPS)

Material Notes:

Product Description: Standard expanded Polystyrene EPS 652 is manufactured by the suspension polymerization of styrene monomer. The polymerization is generally carried out in a batch process. EPS 652 is an expandable polystyrene grade supplied in free-flowing beads, containing pentane (CFC free) as a foaming agent. It is used for fast cycle medium density shape and block molding applications with good surface finish. **Typical Applications:** EPS 652 is a standard fast cycle grade used for articles with large shape molding and medium density molding. Information provided by SABIC.
