

Silberline EternaBrite® Premier 255

Category : Other Engineering Material , Additive/Filler for Polymer

Material Notes:

EternaBrite® Premier 255 is a fine, very bright, leafing aluminum pigment with excellent opacity and distinctness of image (D.O.I) for solvent based general industrial coatings. This product is similar but a more economical alternative to EternaBrite® Premier 251. This grade is not recommended for use with chromatic pigments, as the leafing effect will mask the colorant. Applications: General Industrial; Trade & Maintenance
