

## Solvay Specialty Polymers Tecnoflon<sup>®</sup> NH Fluoroelastomer

Category : Polymer , Thermoset , Fluoropolymer, TS , Thermoset Fluoroelastomer , Rubber or Thermoset Elastomer (TSE)

### Material Notes:

TECNOFLON<sup>®</sup> NH is a high viscosity fluoroelastomer copolymer. Tecnoflon<sup>®</sup> NH is intended as a general purpose fluoroelastomer. It can be blended with other polymers of the Tecnoflon<sup>®</sup> family to meet specific requirements. Tecnoflon<sup>®</sup> NH does not contain curatives: therefore the proper levels of Tecnoflon<sup>®</sup> FOR M1 and Tecnoflon<sup>®</sup> FOR M2 must be added to achieve the required properties. It can be also cured with diamine based systems such as Tecnoflon<sup>®</sup> Tecnocin A and Tecnoflon<sup>®</sup> Tecnocin B. Features: Copolymer; General Purpose; Good Mold Release; High Viscosity; Low Compression Set Uses: Blending; Gaskets; General Purpose; Seals Additional Properties: Fluorine Content - 66 % Information provided by Solvay Specialty Polymers.

Physical Properties	Metric	English	Comments
Mooney Viscosity	27 @Temperature 121 Â°C	27 @Temperature 250 Â°F	ML 1+10; ASTM D1646

Descriptive Properties	Value	Comments
Availability	Europe; North America	
Color	Translucent	
Form	Slab	
Processing Technique	Compounding; Compression Molding
