

## Zeon Chemicals Nipol® 35-5 Nitrile Elastomer

Category : Polymer , Thermoset , Rubber or Thermoset Elastomer (TSE)

### Material Notes:

Nipol® nitrile elastomers are recommended when oil or solvent resistance is needed for the proper functioning of rubber parts. Fuel, oil and solvent resistance improves as acrylonitrile content is increased. Low temperature flexibility and resiliency are improved as butadiene content increases. General-purpose, intermediate-viscosity nitrile rubber. Combines superior physical properties and solvent resistance. Recommended for industrial and automotive applications, transfer molded goods, footwear, etc..

Physical Properties	Metric	English	Comments
Specific Gravity	0.980 g/cc	0.980 g/cc	
Mooney Viscosity	43 - 53 @Temperature 100 °C	43 - 53 @Temperature 212 °F	(1+4)

Descriptive Properties	Value	Comments
AO Type	NS	
Hot/Cold	C
