

## 3M 7220SA Screen Printable Polyester Performance Label Products with Structured Adhesive

Category : Polymer , Adhesive

### Material Notes:

3M™ Screen Printable Polyester Performance Label Products with Structured Adhesive are durable, high performance materials that offer excellent thermal stability and moisture resistance. These topcoated polyester label stocks utilize 3M™ Adhesive 350, which is designed to permanently bond to high and low surface energy plastics, textured and contoured surfaces, powder coatings, and slightly oily metals. With unique microchannels throughout the structured adhesive, air flows freely from between the adhesive and substrate. Hand applied labels go on smoothly and stay that way. Even when labels are used on injection-molded plastic parts, bubbles that form from plastic outgassing can be smoothed to regain a neat appearance for the graphic. Information provided by 3M
