

3M HGS5000 Glass Bubbles

Category : Ceramic , Glass

Material Notes:

3M™ Glass Bubbles HGS Series are engineered hollow glass spheres for use as a density reducing agent for oil and gas drilling fluids and drilling cements. The spherical shape of 3M glass bubbles offers a number of important benefits, including lower viscosity and improved flow. The chemically-stable soda-lime-borosilicate glass composition of 3M glass bubbles makes them virtually insoluble in water or oil. They are also non-compressible. Their low alkalinity gives 3M glass bubbles compatibility with most resins, stable viscosity and long shelf life. Information provided by 3M

Physical Properties	Metric	English	Comments
Density	0.350 - 0.410 g/cc	0.0126 - 0.0148 lb/in³	True, 3M QCM 14.24.6
	0.380 g/cc	0.0137 lb/in³	Typical, 3M QCM 14.24.6
Volatiles	<= 0.50 %	<= 0.50 %	
pH	9.1 - 9.9	9.1 - 9.9	

Mechanical Properties	Metric	English	Comments
Compressive Strength	37.9 MPa	5500 psi	

Descriptive Properties	Value	Comments
Alkalinity	<0.5 milliequivalents/gram	
Appearance	White	unaided eye
