

ChevronTexaco FM Grease EP Aerosol

Category : Fluid , Lubricant , Urea Gellant

Material Notes:

FeaturesChevron FM Grease EP Aerosol is a high performance multipurpose food machinery grease. It is off white in color, tasteless, water-resistant, smooth and buttery in texture, and slightly tacky. It is a blend of a synthetic polyurea complex thickener, food grade white oils (Group II) containing a highly effective rust inhibitor, and propellant. Chevron FM Grease EP Aerosol is specially blended with a high viscosity white mineral oil that imparts improved adhesive and stringiness properties to the grease. **Applications**Chevron FM Grease EP Aerosol is recommended for critical applications where there is a possibility of the lubricant becoming an incidental or accidental food ingredient. Applications include all grease lubricated machinery in canneries, beverage bottlers and canners, potato/corn chip processors, candy manufacturers, meat and poultry packers, frozen food processors and other food producers and processors.
