

## Dow Corning EP-9289 LL Cosmetic Powder

Category : Other Engineering Material , Additive/Filler for Polymer

### Material Notes:

A white cross-linked dimethyl polysiloxane elastomer powder combined with lauroyl lysine. This unique combination enables the powder to improve flow and reduce agglomeration, providing superior handling ease. The design of the powder also allows you to create innovative textures, has good compaction properties and a high sebum absorption profile. INCI Name: Dimethicone/Vinyl Dimethicone Crosspolymer (and) Lauroyl Lysine Information provided by Dow Corning
