

Parker Chomerics WIN-SHIELD™ P (Polycarbonate) EMI Shielded Window

Category : Polymer , Thermoplastic , Polycarbonate (PC) , Polycarbonate, Optical Grade

Material Notes:

Description: Parker Chomerics display windows and filters are available in various plastic materials, including polycarbonate, acrylic and cast polycarbonate. A unique feature of Parker Chomerics window products is the capability to laminate together multiple substrates allowing for a fully customized design. This process allows for the incorporation of specialty materials for EMI shielding, light control, polarization and other value added features. The use of polycarbonate or acrylic offers the most flexibility in application design. Surface

Finish Option: Clear, Semi-Gloss, Matte Hardcoats, & Anti-Reflective Surfaces Design Options: Screen Printing, Heat Shielding, Privacy

Filters & Other Specific Designs are Available. Typical Applications: Ruggedized Displays, Military, Aerospace, Industrial Applications,

Medical, Test Instruments and EMI Shielding for Touch Screens Information provided by Chomerics
