

Silberline Dedusted Flake Series DF-2750 Aluminum Flake

Category : Other Engineering Material , Additive/Filler for Polymer

Material Notes:

DF-2750 Dedusted Aluminum Flake is manufactured by incorporating a small amount of Teflon, with an uncoated aluminum pigment, and then, through further processing, is provided in a dry, non-dusting form. DF-2750 is a coarse, non-leafing, lenticular aluminum pigment. Applications: Powder Coatings
